EXPERIENCE

Logical Position, Palatine IL — SEO Website Developer

05 2021 - PRESENT

- Developed and maintained responsive, high-performance web applications using React.js, Next.js, and TypeScript, ensuring seamless cross-browser compatibility and accessibility (WCAG standards).
- Translated design mockups into mobile first interfaces using HTML5, CSS3, Sass, TailwindCSS, and Bootstrap.
- Collaborated closely with designers to refine user experience, improve usability, and implement consistently user friendly UI/UX.
- Optimized frontend performance through lazy loading, code splitting, and image optimization, improving page load times and Core Web Vitals.
- Integrated RESTful and GraphQL APIs for dynamic, data driven UI components that enhanced user interactivity and real-time updates. Always improving my skillset and looking for new goals to achieve.
- Developed custom Liquid templates for Shopify and automating data driven eCommerce components.
- Built and utilized RESTful APIs using Node.js and Express, connecting backend services with responsive React based frontends.

Freelance — Website Developer & AI Specialist

2023 - PRESENT

- Designed, built, and optimized responsive websites and web applications using React.js, Node.js, and modern CSS frameworks such as Tailwind and Bootstrap.
- Integrated AI-powered features including chatbots, content generation tools, and LLM-driven workflows using OpenAI.
- Collaborated with clients to define project requirements, deliver scalable solutions, and improve site performance, accessibility, and SEO visibility.

Freelance — Full Stack Developer

2024 - PRESENT

- Develop and maintain responsive web applications using a variety of front-end and back-end technologies, including React, Node.js, and SQL, ensuring high performance and scalability.

Management

Experience & Awards

**Logical Position, Above and
Beyond Quarterly Award**

- Collaborate with clients to define project requirements, implement features, and provide technical guidance throughout the development lifecycle.
- Implement end-to-end solutions, from user interface design and server-side logic to database management and API integration, ensuring seamless user experiences.

5 Years of Development, Data Management, Application Development, Software Development

4 Years Website Management and Troubleshooting

Harper College Health & Recreation Center, Palatine IL — *Building Manager*

08 2018 - 04 2021

- **Management** – Coordinating schedules and delegating tasks to team members throughout the day. Responsible for guiding the direction of the team and responding swiftly to issues with a sense of urgency. Resolving issues and problems related to: equipment, services, injuries, and staffing dilemmas.
- **Customer Service** – I took pride in creating a welcoming environment for customers. On occasion, handling difficult situations and high-pressure, emotional conflicts.
- **Process Driven** – Understand what is necessary to ensure smooth operations on a daily basis. I had to consider extracurricular activities; including conventions, competitions, and sporting events when evaluating factors necessary to provide a positive customer experience.

Heinen's Fine Foods, Barrington IL — *Grocery Associate*

08 2015 - 03 2017

- **Customer Service** – I helped create a positive and frictionless experience for shoppers. Assisted shoppers in finding items and resolved issues related to defective or unsatisfactory products. Handled difficult customers and high-pressure situations on an occasional basis.
- **Management Assistance** – Assisted managers with specialized projects. Developed product cards and store maps for common products and high traffic areas. Discussed obstacles that the business is facing and worked collaboratively to solve challenges.
- **New Hire Training** – Mentored new team members and set expectations related to the requirements of the job. Trained employees on proper use of equipment and software programs. Utilized tools and metrics to evaluate new hire performance.

EDUCATION

- Computer Support Technician Certificate
- Certificate Network Support Certificate
- Technician Certificate
- IT Support Technician Certificate

Barrington High School, Barrington, IL — *High School Diploma*

August 2011 - May 2015

PROJECTS

To view my programming projects, follow this link - <https://brettm265.github.io/portfolio2023/>

Web Development Applications 2020-2025

- **HTML, CSS, JavaScript** – I have a solid coding foundation built around these 3 languages. I've created several projects using these alone. Such as calculators, a tic-tac-toe game, and mock stores.
- **API / JSON** – My API Weather App was created using JSON to import a public weather tracking API from openweathermap.org. A class constructor was also used in order to appropriately layout the UI when a user typed in the desired location.
- **React.js** – React.js is my go-to framework and I've built many applications using it. My Portfolio and Game Shop were both created using React.js. I utilized saving data to local storage via State Hooks for my Game Shop. Allowing for a real e-commerce feel.

AI Prompt Engineering

- Programming with AI
- Minimizing hallucinations
- Engineering in depth prompt templates
- Tokens and context seeding
- Utilizing Agents

Back End Web Development Projects 2025

- Deploying a personal website with AWS in 2025.
- Experience with SQL, [Next.js](#), Python
- Experience with Azure, AWS
